

### **Coherent Planning for the Future of Energy**

#### MODULE

### About the Skill Module

This skill module covers the following topics:

- Learning from planning failures
- The future of fossil fuel production
- Integrating electrical generation
- Predicting the cost of generation

See demo online learning module

See example online learning module

#### **Target Audience**

This course is useful for senior and middle management and for anyone involved in the integration of low carbon power generation technologies into existing and future infrastructure.

## You Will Learn

You will learn how to:

- Describe the factors behind recent blackouts and high cost of energy across Europe and California
- Explain the concept of energy density, capacity, and total life cycle
- Describe power supply and demand
- Describe palnning and costing of renewable energy

## **Product Details**

Categories: Energy Transition

Disciplines: Net Zero & Renewables Energy Business

Levels: Basic

Product Type: Individual Skill Module

Format: On-Demand

Duration: 1 hours (approx.)

# \$250.00
