

Depth Conversion Fundamentals

MODULE

About the Skill Module

The intent of this module is to explain the fundamentals needed to convert time to depth in seismic interpretation.

Target Audience

Geologists, geophysicists, and engineers who want to use seismic data for petroleum exploration and/or production. Familiarity with geological terminology will be helpful.

You Will Learn

- The different types of velocities used to convert to depth
- Factors that can affect depth conversion
- Skills needed to convert time to depth
- How time-to-depth conversions are done on a workstation
