

Process Hazards Analysis (PHA) and Layers of Protection Analysis (LOPA) Fundamentals

MODULE

About the Skill Module

This skill module builds on Process Hazards Analysis techniques and Layers of Protection from the Core skill module. It includes an in-depth look at each of the topics listed and two interactive sessions.

Target Audience

Facilities/process engineers, as well as engineers and operations staff involved in process safety and asset integrity.

You Will Learn

Participants will learn how to:

- Select appropriate PHA methods, including HAZOP and API 14C
- Identify suitable applications for LOPA
- Apply learnings to an exercise that will run through this series of skill modules

Product Details

Categories: Midstream

Disciplines: Process Facilities Health, Safety, Environment

Levels: Foundation

Product Type: Individual Skill Module

Format: On-Demand

Duration: 8 hours (approx.)

\$795.00
