

Scope Delivery

MODULE

About the Skill Module

This skill module describes how a scope of work for a shale project is validated and the coordinated plans necessary to complete the execution stage are integrated. Execution plan contents, including the scope of work, are presented. Preparation tips for the execution plan are introduced.

This module counts toward PMI Project Development Units (PDUs) through continuing education. Completion Certificates may be submitted to PMI as required to document third-party training.

See demo online learning module

Target Audience

Early career project managers, leads, engineers, and services personnel who are on field development project teams. This includes operations and facility reps, cost and schedule controllers, and buyers and logistics specialists. This course is also for the business, finance and land reps as well as other non-engineers who would benefit from an overview of oil and gas project and programs.

You Will Learn

- Best practices for developing and validating the contents of a project scope of work
- How a statement of work and a scope of work are related
- How the project execution plan is used to facilitate scope delivery
