

## Gas Conditioning and Processing Principles - G3 - eLearning Course

### COURSE

#### **About the Course**

The Campbell Gas Course® has been the industry standard for more than 50 years and the core competencies of the Campbell Gas Course® are now available in self-paced online Skill Modules.

These competencies set the base knowledge that is required for a successful career as an entry level facilities engineer, seasoned operator, and / or field supervisor. These modules provide an understanding of common terminology, hydrocarbons and their physical properties, qualitative and quantitative phase behavior, hydrates, and fluid flow. In addition, they provide a systematic approach to understanding the common types of equipment, and the primary unit operations in both offshore and onshore gas conditioning and processing facilities.

Each module ranges from 3-5 hours of self-paced activities, with pre-and-post assessments. In addition, the modules have interactive exercises and problems to solve on the various topics. Total course duration is approximately 52 hours of self-paced learning.

See demo online learning module

## **Target Audience**

- Facilities Engineers
- Process Engineers
- Senior Operations Personnel
- Field Supervisors
- Engineers who select, design, install, evaluate or operate gas processing plants and related facilities

### You Will Learn

An understanding of common terminology, hydrocarbons and their physical properties, qualitative and quantitative phase behavior, hydrates, and fluid flow. In addition, they provide a systematic approach to understanding the common types of equipment, and the primary unit operations in both offshore and onshore gas conditioning and processing facilities.

### **Course Content**

The course is made up of the following skill modules (Appox 3-5 Hours Each):

- Hydrocarbon Components & Physical Care Properties
- Introduction to Production & Gas Processing Facilities
- Qualitative Phase Behavior & Vapor Liquid Equalibrium
- · Water/Hydrocarbon Phase Behavior
- Thermodynamics & Application of Energy Balances
- Fluid Flow
- Relief & Flare Systems
- Separations
- Heat Transfer Equipment Overview
- Pumps & Compressors Overview
- Refridgeration, NGL Extraction, & Fractation
- Contaminant Removal Gas Dehydration
- Contaminant Removal Acid Gas & Mercury Removal

## **Product Details**

Categories: Midstream

Disciplines: Gas Processing

Levels: <u>Basic</u>

Product Type: Course

Formats Available: On-Demand Virtual

Instructors: PetroSkills Specialist

# **On-Demand Format**
