

Coherent Planning for the Future of Energy

MODULE

About the Skill Module

This skill module covers the following topics:

- Learning from planning failures
- The future of fossil fuel production
- Integrating electrical generation
- Predicting the cost of generation

See demo online learning module

[See example online learning module](#)

Target Audience

This course is useful for senior and middle management and for anyone involved in the integration of low carbon power generation technologies into existing and future infrastructure.

You Will Learn

You will learn how to:

- Describe the factors behind recent blackouts and high cost of energy across Europe and California
- Explain the concept of energy density, capacity, and total life cycle
- Describe power supply and demand
- Describe planning and costing of renewable energy
