

Greenhouse Gas Emissions Tracking Over Time

MODULE

About the Skill Module

This skill module illustrates how greenhouse gas (GHG) emissions are tracked over time. It introduces the concept of a base year, its selection, justification, and recalculation. Furthermore, it explains significance thresholds and when a base-year recalculation is permissible. It also provides the opportunity to undertake an actual base-year recalculation.

See demo online learning module

Target Audience

Anyone wanting to commence their learning or to further consolidate their fundamental knowledge and competence with regard to Greenhouse Gas

You Will Learn

You will learn how to:

- Assess an organization's greenhouse gas (GHG) emissions over time

- Explain the concept of a base year
- Clarify the rules for recalculation of base-years
- Select a base year
- Justify the selection
- Establish a base-year recalculation policy and process
- Consider significance thresholds
- Identify structural and organizational changes
- Undertake actual base-year recalculations
