

## Business Aspects of Global Warming and Alternative Energies

### MODULE

#### About the Skill Module

This skill module covers the following topics:

- How big is big – how much hydrocarbon usage do we need to displace?
- Carbon net zero
- Energy costs

#### Target Audience

This course is useful for senior and middle management and for anyone involved in the integration of low carbon power generation technologies into existing and future infrastructure.

#### You Will Learn

You will learn how to:

- Gain an insight into how global business is affected by climate change policies
- Quantify the impact of CO2 reduction and the predicted infrastructure requirements, through the lens of power generation
- Describe the Life Cycle Assessment (LCA) process
