

## Financing and Ownership

### MODULE

#### About the Skill Module

This skill module explores financial aspects of how oil and gas companies manage the business of funding projects.

*Where do oil companies get the capital to explore for oil and gas?*

*Do oil companies borrow money to develop projects?*

*How much interest do they pay?*

*What is the hurdle rate and why is it similar for almost all oil companies regardless of whether a large integrated company or an independent upstream company?*

These are some of the financial issues covered in this skill module.

### **Target Audience**

Managers, engineers, explorationists, field accounting supervisors and other personnel who need to develop or improve their skill and understanding of basic economic analysis and profitability of petroleum exploration and production.

### **You Will Learn**

Participants will learn how to:

- Calculate the average cost of capital for a typical oil company
- Recognize the drivers for a company's hurdle
- Determine the opportunity cost of capital
