

Gamma Ray and SP Logging

MODULE

About the Skill Module

This skill module is an introduction to Petrophysical well logging tools and data interpretation. Topics include the Gamma Ray (GR) Log and the Spontaneous Potential (SP) log. The material presented is at the awareness competency knowledge level.

[See example online learning module](#)

Target Audience

Geoscientists and engineers with less than twelve months experience using petrophysical data, Ideal for other technical staff and non-technical staff (e.g., management, drilling operations, technical support staff, finance, legal, IT, supply chain management, and others) at all experience levels wanting a basic background in the petrophysics discipline. This skill module lays the foundation for effective communications between the Subsurface Team and everyone else in the E&P Industry including Service Company and Government employees.

You Will Learn

Participants will learn how to:

- The physics and applications of Gamma Ray and Spontaneous Potential log data
- Concepts of openhole logging in vertical and horizontal wells
- Gamma Ray logging tool function and applications
- Spontaneous Potential logging tool function and applications
