

Organizational Boundaries for Greenhouse Gas Inventories

MODULE

About the Skill Module

This skill module provides a comprehensive understanding of the critical role that organizational boundaries play in GHG emissions reporting. You will be able to navigate the complexities of control and equity share boundaries, apply relevant consolidation methods, and interpret financial and equity definitions.

Whether you are a sustainability professional, an accountant, or a stakeholder interested in transparent GHG reporting, this course will equip you with the knowledge and skills to effectively address the challenges of greenhouse gas inventory boundaries and contribute to meaningful climate action within organizations.
