

Project Resources and Organization

MODULE

About the Skill Module

This skill module discusses how resources are selected and organized in each stage of development. Key issues that affect organization design and personnel selection are examined. We will also explore leadership requirements, stakeholder management and project team alignment.

See demo online learning module

This module counts toward PMI Project Development Units (PDUs) through continuing education. Completion Certificates may be submitted to PMI as required to document third-party training.

Target Audience

Early career project managers, leads, engineers, and services personnel who are on field development project teams. This includes operations and facility reps, cost and schedule controllers, and buyers and logistics specialists. This course is also for the business, finance and land reps as well as other non-engineers who would benefit from an overview of oil and gas project and programs.

You Will Learn

- The key attributes of a shale field development project manager
- How project team roles and responsibilities are aligned
- Organization structures often used for shale field development projects
- How to manage influential internal and external stakeholders for a field development project
