

# **Unfired Pressure Vessels**

# MODULE

# About the Skill Module

This skill module explains the industry pressure vessel design and specifications, including the organizations that provide the applicable codes and standards.

See example Mechanical eLearning module

## **Target Audience**

Facilities Engineers, Process Engineers, Senior Operations Personnel, Field Supervisors, Engineers who select, design, install, evaluate or operate gas processing plants and related facilities

# You Will Learn

Participants will learn how to:

- Identify the purpose of the code
- Identify the sections of the Boilers and Pressure Vessels (B&PV) Code
- Learn the major components of Section VIII, Div. 1
- Differentiate between an ASME Section VIII, Div. 1 vessel and B31.3 piping
- List the bodies and regulations that govern pressure vessel design and operations
- Describe all design criteria items for pressure vessels
- Differentiate between design pressure, maximum allowable working pressure, and maximum allowable pressure
- Discuss design stress levels according to temperatures
- Differentiate between operating and design temperatures and pressures
- List the flange ratings and temperature
- Calculate wall thicknesses of shells, heads, and cones using the formulas from ASME Section VIII, Div. 1
- · List corrosion allowances for process nozzles and minimum nozzle neck thicknesses
- State the differences in types of heat treatment
- · Compare the results of each type of heat treatment
- · Discuss requirements for Post Weld Heat Treatment, methods, and cooling procedures
- · Explain the basics of corrosion including rust
- Determine corrosion allowance (CA) for general hydrocarbon use and natural gas service
- Identify the corrosive elements in hydrocarbon processing
- Discuss ways to combat corrosion

- Discuss the ramifications of vessel penetrations
- Identify the options available to remedy nozzle penetrations
- · Examine the vacuum forces on pressure vessels
- Study the corrosion allowance chart in reference to nozzle sizes
- · Discuss the rules for inspection openings and manways
- Identify the Records Retention requirements
- Examine the following vessel appurtenances: Vessel internals, externals, and supports; Openings (other than process nozzles); Externals; Vessel supports

## **Product Details**

Categories: <u>Midstream</u> Disciplines: <u>Mechanical Engineering</u> Levels: <u>Basic</u> Product Type: Individual Skill Module Format: On-Demand

Duration: 3 hours (approx.)

## \$395.00
