

Waterflood Reservoir Optimization

MODULE

About the Skill Module

In this skill module, we survey the kinds of opportunities available to optimize a waterflood and discuss ways to efficiently implement changes.

[See demo online learning module](#)

Target Audience

Reservoir, production, facilities, and operations engineers who are involved with some aspects of a new or existing waterflood project; geoscientists and professionals who want to get a better feel for the entire process of planning, development, management, and recovery optimization of a waterflood project.

You Will Learn

You will learn how to search for optimization opportunities by:

- Measuring deviations from expectations
- Revisiting design assumptions
- Deploying new technology intelligently
- Moving from secondary to tertiary recovery

Product Details

Categories: [Upstream](#)

Disciplines: [Reservoir Engineering](#)

Levels: [Basic](#)

Product Type: Individual Skill Module

Format: On-Demand

Duration: 4 hours (approx.)

\$395.00
